

Sample Candidate B

Machine learning engineer focused on building and deploying production ML pipelines.

Skills

Python, Machine Learning, scikit-learn, Pandas, NumPy, FastAPI, Docker, MLflow, SQL, Git

Experience

- ML Engineer, DataForge Labs (2022-Present): Trained and deployed scikit-learn models behind a FastAPI service, containerized with Docker, and tracked experiments with MLflow.
- Data Science Intern, University Research Lab (2021): Built machine learning models in Python using Pandas and scikit-learn for a research project.

Projects

- Churn Prediction API: trained a scikit-learn classification model and served predictions through a FastAPI endpoint, deployed with Docker.

Education

B.Tech in Computer Science, Institute of Technology (2022)
