

Sample Candidate C

NLP-focused engineer experienced with modern transformer-based language models.

Skills

Python, NLP, Transformers, Hugging Face, spaCy, Deep Learning, PyTorch, Machine Learning, Git

Experience

- NLP Engineer, TextWorks AI (2023-Present): Fine-tuned Hugging Face transformer models for text classification, built preprocessing pipelines with spaCy, and trained models using PyTorch.
- Research Assistant, Language Technology Lab (2022): Worked on NLP research projects involving transformers and deep learning models for sentiment analysis.

Projects

- Sentiment Classifier: fine-tuned a Hugging Face transformer model with PyTorch and evaluated it on a labeled sentiment dataset.

Education

M.Sc. in Computational Linguistics, Tech University (2023)
